"Club Penguin: Elite Penguin Force" Soundfont

Meta

So I think I finally found it. After searching for ages, the Gadget Room has been found. Apparently they used stock midis from ages ago from a Roland sample library, and I'm guessing I found it. This is not 100% true to the DS because the DS made the instruments sound weirder. If you want the soundfont for your own rips, here's the link to the download.

Just letting you know, the entire Soundtrack of Elite Penguin Force uses Default Midi, so using the Gadget Room midi is perfectly acceptable!
